## Introduction

---

### Product description

The product is a pedestrian-controlled rotary lawn mower. The grass is collected in a grass catcher. Remove the grass catcher to get rear discharge of the grass. Attach a mulch kit (accessory) to cut the grass into fertilizer.

### Product overview

(Fig. 1)

1. Motor brake handle
2. Start inhibitor
3. Power cord socket
4. Power cord holder
5. Handle / handlebar
6. Rear cover
7. Symbols
8. Cutting cover
9. Rating plate
10. Cutting height lever
11. Mulch kit (Accessory)
12. Grass catcher
13. Operator's manual

### Symbols on the product

- (Fig. 2) Injury or death can occur to the operator or bystanders if the product is not used carefully and correctly.
- (Fig. 3) Read the operator's manual and make sure that you understand the instructions before you use this product.
- (Fig. 4) Keep persons and animals at a safe distance from the work area.
- (Fig. 5) Look out for thrown objects and ricochets.
- (Fig. 6) Warning: Keep hands and feet away from the rotating blade.
- (Fig. 7) Warning: Keep hands and feet away from rotating parts.

### Intended use

Use the product to cut grass. Do not use the product for other tasks.

- (Fig. 8) Disconnect the product from electrical outlet before you do maintenance on the product.
- (Fig. 9) IPX4 - The product has protection against splashing water.
- (Fig. 10) Warning: Do not operate the product across the power cord as this can result in electrical shock or damage to the product.
- (Fig. 11) This product is in accordance with applicable EC directives.
- (Fig. 12) Noise emission to the environment label as per EU and UK directives and regulations, and New South Wales legislation "Protection of the Environment Operations (Noise Control) Regulation 2017". The guaranteed sound power level of the product is specified in *Technical data on page 16* and on the label.
- (Fig. 13) Direct current. 36V
- (Fig. 14) Double insulation.
- (Fig. 20) Recycle this product at a recycling location for electrical and electronic equipment. (Applies to Europe only)
- (Fig. 15) Start procedure: loosen start inhibitor, push motor brake handle down.

(Fig. 16) Release motor brake handle to stop.

(Fig. 17) Slow

(Fig. 18) Fast

(Fig. 19) Scannable code

**Note:** Other symbols/decals on the product refer to certification requirements for some markets.

## Product damage

We are not responsible for damages to our product if:

- the product is incorrectly repaired.
- the product is repaired with parts that are not from the manufacturer or not approved by the manufacturer.
- the product has an accessory that is not from the manufacturer or not approved by the manufacturer.
- the product is not repaired at an approved service center or by an approved authority.

## Safety

### Safety definitions

Warnings, cautions and notes are used to point out specially important parts of the manual.

**WARNING:** Used if there is a risk of injury or death for the operator or bystanders if the instructions in the manual are not obeyed.

**CAUTION:** Used if there is a risk of damage to the product, other materials or the adjacent area if the instructions in the manual are not obeyed.

**Note:** Used to give more information that is necessary in a given situation.

### General product safety warnings

**WARNING:** Read all safety warnings, instructions, illustrations and specifications provided with this product. Failure to follow all instructions listed below may result in electric shock, fire and/or serious injury.

**Save all warnings and instructions for future reference.**

The term "product" in the warnings refers to your mains-operated (corded) product or battery-operated (cordless) product.

### Work area safety

- **Keep work area clean and well lit.** Cluttered or dark areas invite accidents.
- **Do not operate the product in explosive atmospheres, such as in the presence of flammable liquids, gases or dust.** The product creates sparks which may ignite the dust or fumes.
- **Keep children and bystanders away while operating the product.** Distractions can cause you to lose control.

### Electrical safety

- **Product plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) products.** Unmodified plugs and matching outlets will reduce risk of electric shock.
- **Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators.** There is an increased risk of electric shock if your body is earthed or grounded.
- **Do not expose products to rain or wet conditions.** Water entering a product will increase the risk of electric shock.
- **Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the product. Keep cord away from heat, oil, sharp edges or moving parts.** Damaged or entangled cords increase the risk of electric shock.
- **When operating a product outdoors, use an extension cord suitable for outdoor use.** Use of a cord suitable for outdoor use reduces the risk of electric shock.
- **If operating a product in a damp location is unavoidable, use a residual current device (RCD) protected supply.** Use of an RCD reduces the risk of electric shock.

### Personal safety

- **Stay alert, watch what you are doing and use common sense when operating a product. Do not use a product while you are tired or under the influence of drugs, alcohol or medication.** A moment of inattention while operating products may result in serious personal injury.
- **Use personal protective equipment. Always wear eye protection.** Protective equipment such as dust mask, non-skid safety shoes, hard hat or hearing protection used for appropriate conditions will reduce personal injuries.
- **Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the product.** Carrying products with your finger on the

switch or energising products that have the switch on invites accidents.

- **Remove any adjusting key or wrench before turning the product on.** A wrench or a key left attached to a rotating part of the product may result in personal injury.
- **Do not overreach. Keep proper footing and balance at all times.** This enables better control of the product in unexpected situations.
- **Dress properly. Do not wear loose clothing or jewellery. Keep your hair and clothing away from moving parts.** Loose clothes, jewellery or long hair can be caught in moving parts.
- **If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used.** Use of dust collection can reduce dust-related hazards.
- **Do not let familiarity gained from frequent use of products allow you to become complacent and ignore product safety principles.** A careless action can cause severe injury within a fraction of a second.

## Product use and care

- **Do not force the product. Use the correct product for your application.** The correct product will do the job better and safer at the rate for which it was designed.
- **Do not use the product if the switch does not turn it on and off.** Any product that cannot be controlled with the switch is dangerous and must be repaired.
- **Disconnect the plug from the power source and/or remove the battery pack, if detachable, from the product before making any adjustments, changing accessories, or storing products.** Such preventive safety measures reduce the risk of starting the product accidentally.
- **Store idle products out of the reach of children and do not allow persons unfamiliar with the product or these instructions to operate the product.** Products are dangerous in the hands of untrained users.
- **Maintain products and accessories. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the product's operation. If damaged, have the product repaired before use.** Many accidents are caused by poorly maintained products.
- **Keep cutting tools sharp and clean.** Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.
- **Use the product, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed.** Use of the product for operations different from those intended could result in a hazardous situation.
- **Keep handles and grasping surfaces dry, clean and free from oil and grease.** Slippery handles and grasping surfaces do not allow for safe handling and control of the product in unexpected situations.

## Service

- **Have your product serviced by a qualified repair person using only identical replacement parts.** This will ensure that the safety of the product is maintained.

## Lawnmower safety warnings

- **Do not use the lawnmower in bad weather conditions, especially when there is a risk of lightning.** This decreases the risk of being struck by lightning.
- **Thoroughly inspect the area for wildlife where the lawnmower is to be used.** Wildlife may be injured by the lawnmower during operation.
- **Thoroughly inspect the area where the lawnmower is to be used and remove all stones, sticks, wires, bones, and other foreign objects.** Thrown objects can cause personal injury.
- **Before using the lawnmower, always visually inspect to see that the blade and the blade assembly are not worn or damaged.** Worn or damaged parts increase the risk of injury.
- **Check the grass catcher frequently for wear or deterioration.** A worn or damaged grass catcher may increase the risk of personal injury.
- **Keep guards in place. Guards must be in working order and be properly mounted.** A guard that is loose, damaged, or is not functioning correctly may result in personal injury.
- **Keep all cooling air inlets clear of debris.** Blocked air inlets and debris may result in overheating or risk of fire.
- **While operating the lawnmower, always wear non-slip and protective footwear. Do not operate the lawnmower when barefoot or wearing open sandals.** This reduces the chance of injury to the feet from contact with the moving blade.
- **While operating the lawnmower, always wear long trousers.** Exposed skin increases the likelihood of injury from thrown objects.
- **Do not operate the lawnmower in wet grass. Walk, never run.** This reduces the risk of slipping and falling which may result in personal injury.
- **Do not operate the lawnmower on excessively steep slopes.** This reduces the risk of loss of control, slipping and falling which may result in personal injury.
- **When working on slopes, always be sure of your footing, always work across the face of slopes, never up or down and exercise extreme caution when changing direction.** This reduces the risk of loss of control, slipping and falling which may result in personal injury.
- **Use extreme caution when reversing or pulling the lawnmower towards you. Always be aware of your surroundings.** This reduces the risk of tripping during operation.

- **Keep the supply cord away from the cutting blades.** A damaged supply cord may result in electric shock, fire and/or serious injury.
- **Switch off and remove plug from mains if the cord is entangled or damaged.** Entangled or damaged cords can increase the risk of electric shock.
- **Do not touch blades and other hazardous moving parts while they are still in motion.** This reduces the risk of injury from moving parts.
- **When clearing jammed material or cleaning the lawnmower, make sure all power switches are off and the power cord is disconnected.** Unexpected operation of the lawnmower may result in serious personal injury.

### Residual current device

- Use a residual current device with a tripping current of maximum 30 mA.

## General safety instructions

**WARNING:** Read the warning instructions that follow before you use the product.

- This product is dangerous if used incorrectly or if you are not careful. Injury or death can occur if you do not obey the safety instructions.
- This product produces an electromagnetic field during operation. This field may under some circumstances interfere with active or passive medical implants. To reduce the risk of serious or fatal injury we recommend persons with medical implants to consult their physician and the medical implant manufacturer before operating this product.
- Always be careful and use your common sense. If you are not sure how to operate the product in a special situation, stop and speak to your Husqvarna dealer before you continue.
- Keep in mind that the operator will be held responsible for accidents that involve other persons or their property.
- Keep the product clean. Make sure that you can clearly read signs and decals.
- Never allow children or people unfamiliar with these instructions to use the appliance. Local regulations may restrict the age of the operator.
- Always monitor a person, with decreased physical capacity or mental capacity, that uses the product. A responsible adult must be there at all times.
- Do not use the product if you are tired, ill, or under the influence of alcohol, drugs or medicine. This has a negative effect on your vision, alertness, coordination and judgment.
- Do not use the product if it is damaged or does not operate correctly.
- Do not change this product or use it if it is possible that it has been changed by others.

- The maximum permitted impedance of the power supply is 0.347  $\Omega$  (Zmax). Speak to the power supply authority to make sure that the product is connected only to a power supply that has maximum permitted impedance or less.

## Work safety

**WARNING:** Read the warning instructions that follow before you use the product.

- Use this product to cut grass lawns only. It is not permitted to use it for other tasks.
- Use personal protective equipment. Refer to *Personal protective equipment on page 11*.
- Make sure that you know how to stop the motor quickly in an emergency.
- Do not operate the product in rain or wet conditions. The risk of electrical shock increases if water enters the product.
- Do not operate the product unless the blade and all covers are attached correctly. An incorrectly attached blade can come loose and cause personal injury.
- Make sure that the blade does not hit objects such as stones and roots. This can do damage to the blade and bend the motor shaft. A bent axle causes heavy vibration and a very high risk that the blade becomes loose.
- If the blade hits an object or if vibrations occur, stop the product immediately. Stop the motor and disconnect the power cord. Examine the product for damages. Repair damages or let an authorised service agent do the repair.
- Never attach the motor brake handle permanently to the handle when the motor is started.
- Put the product on a stable, flat surface and start it. Make sure that the blade does not hit the ground or other objects.
- Always stay behind the product when you operate it.
- Let all the wheels stay on the ground and keep 2 hands on the handle when you operate the product. Keep your hands and feet away from the rotating blades.
- Do not tilt the product when the motor is started.
- Be careful when you pull the product rearward.
- Never lift up the product when the motor is started. If you must lift the product, stop the motor and disconnect the power cord.
- Do not walk rearward when you operate the product.
- Stop the motor when you move across areas without grass, for example paths made of gravel, stone and asphalt.
- Do not run with the product when the motor is started. Always walk when you operate the product.
- Stop the motor before you change the cutting height. Never make adjustments with the motor started.

- Never let the product stay out of view with the motor started. Stop the motor and make sure that the cutting equipment does not rotate.

## Safety instructions for operation

### Personal protective equipment

**WARNING:** Read the warning instructions that follow before you use the product.

- Personal protective equipment cannot fully prevent injury but it decreases the degree of injury if an accident does occur. Let your dealer help you select the right equipment.
- Use heavy-duty slip-resistant boots or shoes. Do not use open shoes or go with bare feet.
- Use heavy, long pants.
- Use protective gloves when necessary, for example when you attach, examine or clean the cutting equipment.
- We recommend to use hearing protection.

### Safety devices on the product

**WARNING:** Read the warning instructions that follow before you use the product.

- Do not use a product with safety devices that are damaged or do not operate correctly.
- Do a check of the safety devices regularly. If the safety devices are damaged or do not operate correctly, speak to your Husqvarna service agent.
- Do not make modifications to safety devices.

#### To do a check of the cutting cover

The cutting cover decreases vibrations in the product and decreases the risk of injury from the blade.

- Examine the cutting cover to make sure that there are no damages such as cracks.

#### Motor brake handle

The motor brake handle stops the motor. When the motor brake handle is released, the motor stops.

To do a check of the motor brake, start the motor and then release the motor brake handle. If the motor does not stop in 3 seconds, let an approved Husqvarna service agent adjust the motor brake.

(Fig. 21)

#### To examine the start inhibitor

Do a check of the start inhibitor to make sure that it prevents operation of the motor.

1. Push the motor brake handle in the direction of the handlebar. The start inhibitor stops the movement.
2. Push the start inhibitor out. (Fig. 22)
3. Release the start inhibitor and make sure that it goes back to its initial position.

#### To use the power cord holder

The power cord holder decreases the strain on the power socket and the power cord. The power cord holder also decreases the risk that you fall.

1. Bend the power cord to a small loop.
2. Put the loop in to the hole in the power cord holder.
3. Put the loop around the hook.
4. Pull the power cord to tighten the loop around the hook. (Fig. 23)

### Power cord safety

- The use of a Residual Current Device (R.C.D.) with a tripping current of not more than 30mA is recommended. Even with an R.D.C. installed, 100% safety cannot be guaranteed and safe work procedures must be obeyed at all times. Do a check of your R.C.D. each time you use it.
- Immediately disconnect from the mains if the power cord is cut or the insulation is damaged.
- Do not touch a cut or damaged power cord until the electrical supply is disconnected.
- Do not repair a cut or damaged power cord. Replace it with a new one.

## Safety instructions for maintenance

**WARNING:** Read the warning instructions that follow before you use the product.

- To prevent accidental start during maintenance, disconnect the power cord.
- Do the maintenance work correctly to increase the lifetime of the product and decrease the risk of accidents. Let an approved service agent do the professional repairs. Speak to your nearest service agent for more information.
- Only do the maintenance work written in this operator's manual. More extensive work must be done by an approved service agent.
- Put on heavy duty gloves when you use the cutting equipment. The blade is very sharp and cuts can easily occur.
- Keep the cutting edges sharp and clean for the best and safest performance.
- Let your service agent regularly examine the product and make necessary adjustments and repairs.
- Replace damaged, worn or broken parts.
- Obey the instructions for how to change accessories. Only use accessories from the manufacturer.

- When not in operation, keep the product indoor and locked area. Make sure that children and persons

that are not approved cannot get access to the product, battery or battery charger.

---

## Assembly

---

### Introduction

**WARNING:** Before you assemble the product, read the safety chapter.

**WARNING:** To prevent accidental start during assembly, disconnect the power cord.

### To assemble the handle

1. Push the screw (A) through the handle (B), the plastic washer (C) and the handle support bracket (D). (Fig. 24)
2. Tighten the nut (E) fully.
3. Push the screw (F) through the washer (G) and the handle support bracket.
4. Tighten the knob (H) fully.
5. Align the holes in the handlebar with the holes in the lower handle and attach the screws, washers and knobs. Tighten the knobs fully. (Fig. 25)
6. Attach the cables to the handle with the cable holders. (Fig. 26)

**Note:** Make sure that the tension in the cables is not too high. A too high tension can cause damage to the cable if the handle is folded to transport position.

7. Put the cables around the hook at the bottom of the handle. (Fig. 27)

### To adjust the handle height

1. Loosen the lower knobs. (Fig. 28)
2. Remove the knob, washer, and screw on the left and the right side.
3. The handle can be set to 2 different heights. Put the screw in one of the 2 holes on the left and the right side. (Fig. 29)
4. Attach the screws, washers and knobs.
5. Move the knobs up in the direction of the handle until they stop and you hear a click. Tighten the knobs fully. (Fig. 30)

### To assemble the grass catcher

1. Push the 2 transportation covers out and down. (Fig. 31)
2. Put the top part of the grass catcher onto the lower part of the grass catcher. Attach the grass catcher frame with the clips. (Fig. 32)
3. Lift the rear cover.
4. Attach the hooks on the grass catcher to the top edge of the chassis. (Fig. 33)

### To assemble the mulch plug

1. Lift the rear cover and remove the grass catcher.
2. Put the mulch plug into the grass discharge channel. (Fig. 34)
3. Close the rear cover.
4. Replace the blade with the Combi blade that is supplied with the mulch kit. Refer to *To remove and replace the blade on page 14*.

---

## Operation

---

### Introduction

**WARNING:** Before you operate the product, you must read and understand the safety chapter.

### Husqvarna Connect

Husqvarna Connect is a free app for your mobile device. The Husqvarna Connect app gives extended functions for your Husqvarna product:

- Extended product information.
- Information about, and help with, product parts and servicing.

### To start to use Husqvarna Connect

1. Download the Husqvarna Connect app on your mobile device.
2. Register in the Husqvarna Connect app.
3. Do the instruction steps in the Husqvarna Connect app to connect and register the product.

### To set the product in operation position

If the handle is put in transport and storage position (see *To set the product in transport position on page 15*), do the procedure that follows to put the handle in operation position.

1. Lift the handle until the lower handle locks into operation position. (Fig. 35)

2. Move the lower knobs up in the direction of the handle until they stop and you hear a click. (Fig. 30)
3. Tighten the knobs.
4. Lift the upper handle and tighten the knobs. (Fig. 36)

## To set the cutting height

1. Move the cutting height lever rearward to increase the cutting height.
2. Move the cutting height lever forward to decrease the cutting height. (Fig. 37)

**CAUTION:** Do not set the cutting height too low. The blades can hit the ground if the surface of the lawn is not level.

## To select an approved cable

**Note:** For the UK market, use only the 16M extension cable that comes with the product. For all other markets, refer to the information below.

If extension cables are used, these must comply with the minimum cross-sections in the table below:

Voltage	Cable length	Cross section
220–240V/ 50Hz	Up to 20 m	1.5 mm <sup>2</sup>
220–240V/ 50Hz	20–50 m	2.5 mm <sup>2</sup>

- Mains cables and extension cables are available from your local approved service agent for Husqvarna outdoor products.
- Only use extension cables specifically designed for outdoor use and which conform to one of the following specifications: Ordinary rubber (60245 IEC 53), Ordinary PVC (60227 IEC 53) or Ordinary PCP (60245 IEC 57).
- If the cable is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

## To start the product

1. Connect a power cord to the socket below the handle. (Fig. 38)
2. Put the power cord in the power cord holder. Refer to *To use the power cord holder on page 11*. (Fig. 23)
3. Stay behind the product.
4. Loosen the start inhibitor. (Fig. 39)
5. Push the motor brake handle in the direction of the handlebar. (Fig. 40)

## To stop the product

1. Release the motor brake handle to stop the motor. (Fig. 41)
2. Disconnect the power cord from the mains and then from the product. (Fig. 42)

**CAUTION:** Pull the plug straight out. Do not pull the power cord.

## To get a good result

- Always use a sharp blade. A blunt blade gives an irregular result and the cut surface of the grass becomes yellow. A sharp blade also uses less energy than a blunt blade.
- Do not cut more than  $\frac{1}{3}$  of the length of the grass. Cut first with the cutting height set high. Examine the result and lower the cutting height to an applicable level. If the grass is very long, drive slowly and cut 2 times if necessary.
- Cut in different directions each time to prevent stripes in the lawn.
- Keep the cutting cover clean. Buildup from grass and dirt on the inner side of the cutting cover can decrease the cutting result. Refer to *To clean the product on page 14*.

# Maintenance

## Introduction

**WARNING:** Before you do maintenance, you must read and understand the safety chapter.

For all servicing and repair work on the product, special training is necessary. We guarantee the availability of professional repairs and servicing. If your dealer is not a service agent, speak to them for information about the nearest service agent.

For more detailed information, refer to .

## Maintenance schedule

The maintenance intervals are calculated from daily use of the product. The intervals change if the product is not used daily.

For maintenance identified with \*, refer to *Safety on page 8*.

	Each use	Monthly	Each season
Do a general inspection.	X		
Clean the product.	X		
Do a check of the start inhibitor *.	X		
Make sure that the safety devices on the product are not defective *.	X		
Examine the cutting equipment.	X		
Examine the cutting cover *.	X		
Do a check of the motor brake handle *.	X		

### To do a general inspection

- Make sure that the nuts and screws on the product are tightened.
- Make sure that the cables on the product are not in a position where they can get damaged.

### To clean the product

- Clean plastic parts with a clean and dry cloth.
- Do not use water to clean the product. Water can enter the battery or the motor and cause short circuit or damage to the product.
- Do not use a high pressure washer to clean the product.
- Do not flush water directly on the motor.
- Use a brush to remove leaves, grass and dirt.

### To examine the cutting equipment

**WARNING:** To prevent accidental start, disconnect the power cord.

**WARNING:** Use protective gloves when you do maintenance on the cutting equipment. The blade is very sharp and cuts can easily occur.

1. Examine the cutting equipment for damage or cracks. Always replace a damaged cutting equipment.
2. Look at the blade to see if it is damaged or blunt.

**Note:** It is necessary to balance the blade after it is sharpened. Let a service center sharpen, replace and

balance the blade. If you hit an obstacle that causes the product to stop, replace the damaged blade. Let the service center estimate if the blade can be sharpened or must be replaced.

### To remove and replace the blade

1. Lock the blade with a block of wood. (Fig. 43)
2. Remove the blade bolt.
3. Remove the blade.
4. Examine the blade support and blade bolt to see if there are damages.
5. Examine the motor shaft to make sure that it is not bent.
6. When you attach the new blade, point the angled ends of the blade in the direction of the cutting cover. (Fig. 44)
7. Make sure that the blade is aligned with the center of the motor shaft.
8. Lock the blade with a block of wood. Attach the spring washer and tighten the bolt and washer with a torque of 20 Nm. (Fig. 45)
9. Pull the blade around by hand and make sure that it turns freely.

**WARNING:** Use heavy duty gloves. The blade is very sharp and cuts can easily occur.

10. Start the product to do a test of the blade. If the blade is not correctly attached, there is vibration in the product or the cutting result is unsatisfactory.

---

## Troubleshooting

---

### Troubleshooting

Problem	Possible cause	Solution
The product does not start.	The power cord is not connected to a power source.	Connect the power cord to a power source.
	The power cord is not connected to the product.	Connect the power cord to the socket below the handle.
	The motor brake handle is not pushed in the direction of the handlebar.	Push the motor brake handle in the direction of the handlebar.
	The power cord is damaged.	Speak to an approved service agent.
	Other errors.	

---

## Transportation, storage and disposal

---

### To set the product in transport position

1. Remove the grass catcher (if installed).
2. Loosen the knobs on the upper handle and fold the handle down. (Fig. 46)
3. Loosen the lower knobs.
4. Move the knobs to the lower end of the grooves on the left and the right side of the product. (Fig. 47)
5. Fold the handle forward. (Fig. 48)

### Transportation

- For commercial transports, requirements on package and labels must be obeyed.
- Make sure that you obey the regulations for dangerous material when you prepare the product for transport. Local regulations can apply.
- Attach the product during transport.

### Storage

- Let the product become cool before storage.
- Keep the product where the ambient temperature is between -10°C and 40°C.
- Keep the product in a locked area out of reach for children and not approved persons.

- Clean the product and make sure that the grass catcher is empty.
- Do the maintenance procedures given in this operator's manual. Refer to *Maintenance on page 13*.
- Do a complete servicing before you put the product in storage for a long time.

### Disposal

Symbols on the product or the packaging of the product indicate that this product cannot be handled as domestic waste. It must be submitted to an appropriate recycling station for the recovery of electrical and electronic equipment.

By ensuring that this product is taken care of correctly, you can help to counteract the potential negative impact on the environment and people that can otherwise result through the incorrect waste management of this product. For more detailed information about recycling this product, contact your municipality, your domestic waste service or the shop from where you purchased the product.

(Fig. 49)

## Technical data

### Technical data

<b>Motor</b>	
Motor type	Series AC Motor
Motor speed – Nominal, rpm	3200
Power	1800 W
Power source	Corded electric
<b>Power cable (included for the UK market only)</b>	
Cable type	16M extension cord
Weight, kg	1.6
<b>Weight</b>	
Weight, kg	20.4
<b>Noise emissions <sup>1</sup></b>	
Sound power level, measured dB (A)	93
Sound power level, guaranteed L <sub>WA</sub> dB (A)	95
<b>Sound levels <sup>2</sup></b>	
Sound pressure level at the operators ear, dB (A)	85
<b>Vibration levels <sup>3</sup></b>	
Handle, m/s <sup>2</sup>	2.0
<b>Cutting</b>	
Cutting height, mm	25–70
Cutting width, cm	41
Blade, Article number	Collect 5011716-01
Bagger capacity, litre	50

<sup>1</sup> Noise emissions in the environment measured as sound power (L<sub>WA</sub>) in conformity with EC directive 2000/14/EC.

<sup>2</sup> Reported data for noise pressure level has a typical statistical dispersion (standard deviation) of 1.4 dB (A).

<sup>3</sup> Reported data for vibration level has a typical statistical dispersion (standard deviation) of 0.2 m/s<sup>2</sup>.

# Declaration of Conformity

## EU Declaration of Conformity

We, **Husqvarna AB**, SE-561 82 Huskvarna, Sweden, tel: +46-36-146500, declare on our sole responsibility that the product:

<b>Description</b>	Lawn Mower
<b>Brand</b>	Husqvarna
<b>Type / Model</b>	LC 141C
<b>Identification</b>	Serial numbers dating from 2023 and onwards

complies fully with the following EU directives and regulations:

<b>Regulation</b>	<b>Description</b>
2006/42/EC	"relating to machinery"
2000/14/EC	"relating to the noise emissions in the environment"
2014/30/EU	"relating to electromagnetic compatibility"
2011/65/EU	"on the restriction of the use of certain hazardous substances in electrical and electronic equipment"

and that the following standards and/or technical specifications are applied: EN 62841-1:2015/A11:2022, EN IEC 62841-4-3:2021/A11:2021

Notified Body: 0404, SMP Svensk Maskinprovning AB, Box 4053, SE-904 03 Umeå, Sweden has certified conformity with the council's directive 2000/14/EC, conformity assessment procedure: Annex VI.

For information relating to noise emissions, refer to *Technical data on page 16*.

Huskvarna, 2024-07-20
